

Proposed question based on Bloom's Taxonomy

Bloom's Taxonomy	Question 1 (Numbers)	Question 2 (Text)
Remember	<p>Collect data on nominal GDP, real GDP, nominal GDP per capita, real GDP per capita, real GDP growth, unemployment during the 2007-2022 period (or up to the time that data are available) for Austria and Thailand.</p> <p>Plot both countries' GDP on a line chart and GDP per capita on another line chart. Which country has a higher GDP? Which country has a higher GDP per capita? Are they the same country? Provide some comments.</p>	What are the distinctions between GDP and GDP per capita? Elaborate the distinctions.
Understand	<p>Collect data on nominal GDP, real GDP, nominal GDP per capita, real GDP per capita, real GDP growth, unemployment during the 2007-2022 period (or up to the time that data are available) for Austria and Thailand.</p> <p>Choose one country and plot its nominal and real GDP on a line chart. Compare and contrast the trend and fluctuations of nominal and real GDP.</p>	Suppose a country's nominal GDP grows faster than its real GDP. What could explain this phenomenon?
Apply	<p>Collect data on nominal GDP, real GDP, nominal GDP per capita, real GDP per capita, real GDP growth, unemployment during the 2007-2022 period (or up to the time that data are available) for Austria and Thailand.</p> <p>Plot the GDP growth for both countries. Which country experienced a higher economic growth? Identify two main growth drivers of this country.</p>	Critique the assertion that rich countries consistently grow at a slower pace than poor countries.
Analyze	Collect data on nominal GDP, real GDP, nominal GDP per capita, real GDP per capita, real GDP growth, unemployment during the 2007-2022	Reflect critically on the idea that technologies such as automation, robotics, and AI could

	<p>period (or up to the time that data are available) for Austria and Thailand.</p> <p>Select one country and the period of its highest unemployment. Analyze the type(s) and cause(s) of unemployment during this period.</p>	<p>exacerbate unemployment. Which type(s) of unemployment could be most affected?</p>
Evaluate	<p>Collect data on nominal GDP, real GDP, nominal GDP per capita, real GDP per capita, real GDP growth, unemployment during the 2007-2022 period (or up to the time that data are available) for Austria and Thailand.</p> <p>Evaluate the growth potential of both countries. What are the differences in growth prospects between developed and developing countries?</p>	<p>Evaluate the effects of AI adoption on economic growth in developing and developed countries.</p>
Create	<p>Collect data on nominal GDP, real GDP, nominal GDP per capita, real GDP per capita, real GDP growth, unemployment during the 2007-2022 period (or up to the time that data are available) for Austria and Thailand.</p> <p>Select one country. Based on your analysis, recommend a policy to foster its economic growth.</p>	<p>Select a developed and a developing country. What strategies could each employ to leverage AI technology for sustainable growth?</p>
